To whom it may concern

Re: Proposed Residential Development at Ka Wo Li Hill Road, Tuen Mun, TMTL 434

We write to confirm that Messer. Kesford (Hong Kong) Ltd. is employed by our company to supply, mix and add the “Penetron Admix” waterproofing concrete admixture to the ready mixed concrete to form waterproofing concrete for the captioned project.

The “Penetron Admix” waterproofing concrete admixture was adopted to the screen wall, slab of basement structure, water tanks and roof slabs. Up to the date of this letter, the “Penetron Admix” waterproofing concrete works had been completed almost 2 years without report of any significant leakage.

Yours faithfully,

For and on behalf of  
Paul Y. Builders Limited

Alex LO  
Project Manager
